

# THE GLEICHEN CALL

VOLUME XXVIII

NO. 37-38

GLEICHEN, ALBERTA, WEDNESDAY DECEMBER 4, 1935

SUBSCRIPTION \$2.00 PER YEAR

## BLACKFOOT M. D. COUNCILLORS IN REGULAR SESSION

A meeting of the councillors of the Blackfoot Municipality was held in the municipal office. Those present were Reeve Thorsen, Deputy-Reeve Umbrite and Councillors Deschamps, Nelson and Wheatley. The minutes of the last meeting were adopted as read.

The resolution of the last meeting was forwarded to the Department of Education, regarding grants to hauled out school districts. The Deputy Minister replied by stating "It is felt that the municipal district would have no difficulty in negotiating further loans to enable it to keep the schools in question open."

Councillor Wheatley carried a motion that read as follows: In view of 45 per cent of this district being hauled out and a further 15 per cent affected by draught and frost and not threatening more than four bushels of poor wheat to the acre, we feel that this municipality is being unfairly dealt with by the Department of Education. And we earnestly request that the government of the Province of Alberta reconsider the question of making a special grant to keep the schools in question in operation.

It was decided to offer Mr. P. P. Kondachuk \$25 an acre for land required for a permanent road through section 25-21-21. It is to be pointed out to him that if the council are compelled to expropriate this land they will have to arbitrate with the Western Stock Ranches and the Bank of Montreal.

Councillor Nelson: That councillors approve applications for farm help in respect to their divisions and that the application signed by the secretary on November 9th for Harvey Bros. of Strathmore be approved.—Carried.

The Supervisor, Charity and Relief is to be requested to reimburse the municipality for unemployment relief on the old basis of 58 and one-third per cent as the new arrangements causes an unfair financial burden upon the district.

Councillor Umbrite: That the Municipal District agree to abide by the rules and regulations governing unemployment relief and to accept the ruling of the relief branch as to responsibility for the recipients of relief.—Carried.

It was decided that all direct relief applications were to be reviewed at each regular monthly meeting of the council and approved orders issued to the applicant on a merchant or landlord upon relief order forms.

## JAMES CLARK REAL OLD TIMER DIED LAST WEEK

James Clark of Crowfoot Creek, one of Alberta's best known pioneers, died Tuesday morning, November 26, following an illness of over two years.

Deceased was born in Scotland in 1859. With his parents and family he came as a young man to Montreal, remaining there a short time. In company with his brother John, now deceased, he journeyed west through the United States arriving at Blackfoot Crossing, south of Cluny, in May 1883, where they were joined later by their father, now deceased, and their brother Duncan, who came in from Moose Jaw by Red River cart, in advance of the railway. For some time the late Mr. Clark was employed by the C.P.R. in the bridge building department, Western Division, having several narrow, crosses the year of the big floods in the mountains. One case in particular the supports of the bridge gave away when he was part way over with a pile driver. After getting his machine safely back on dry land he was highly commended for his actions by Mr. Whyte, general superintendent.

A ranch was later established under the name of Clark Brothers, a name eventually to become famous as a prize winner in shows throughout Western Canada for its registered Clydesdale stock. Mr. Clark having won more first prizes and Grand Championships than any individual breeder in Western Canada. A large herd of good quality cattle was also owned and reaching at least the number of 1,500 head at the time it was disposed of in July 1912. Since that time the late Mr. Clark had been ranching

and farming east of Cluny on the Crowfoot Creek.

In the old days his ranch was well known to all the old timers as a rendezvous where they could expect hospitality, being one of the best known points in the district.

Surviving the late Mr. Clark are his brother Duncan, of Cluny, and his sister Mrs. Margaret Taylor, Creighton B. C.

Rev. J. H. Wilkinson officiated at the funeral service which was held in the United Church, Gleichen, at 3 p.m. Thursday. The funeral was largely attended by old timers and friends. The pallbearers were: Messrs H. Scott, W. W. Brown, H. Forsyth, A. Peters, L. Nelson and F. Courtney. Interment took place in the family plot in the Gleichen cemetery.

The following floral offerings were noted: Duncan, Jamie, Annie, Ronald, Ebbie, Gladys; Mr. and Mrs. D. Nelson; Gleichen Old Timers Association; Mrs. C. E. Clark; Mr. and Mrs. John Clark; Mrs. M. G. Goss; Mr. and Mrs. J. W. Brown and family; Maggie; V. J. Keir.

## COMING EVENTS

Dec. 6—Tenth annual Old Timers' Ball.

Dec. 13—Dance Meadowbrook Hall 1-piece orchestra.

## U.F.W.A. MEET IN REGULAR SESSION

Mrs. E. J. Garland was hostess for the U.F.W.A. meeting when some 14 members and visitors were present. The call was answered by "Your Favorite Song."

Mrs. E. Etheridge read a very interesting bulletin and reading course. Mrs. J. W. Hutchinson read an article in "Bringing up Children." Old business consisted of Bazaar which was postponed on account of the bad weather. It was decided to hold it in the Girl Guides Hall on Saturday, December 14. The members were disappointed that Mrs. Swain was not prepared to give a violin solo as programmed.

## C. W. HARRISON PIONEER FARMER DIED SUNDAY

It was with much surprise that many friends of Charles William Harrison learned that he had passed away early Sunday morning at his farm home some four miles north west of town, from an accident he had suffered the previous day.

Saturday morning about 11 o'clock Mr. Harrison and his helper were in a small sleigh with a box, and were driving across the yard when the sleigh suddenly tipped forward throwing out both men. Mr. Harrison was hurt in the back and was immediately picked up and carried into the house and medical aid called. During the afternoon he seemed to be getting along alright but at night took a turn for the worse and passed away in the early morning.

Deceased was born in Collingwood, Ont. on July 27, 1875. In 1900 he came to Gleichen and located on the farm northwest of town where he has resided ever since. For the past nine years he was a member of the Gleichen school board of which he took a great interest.

Mr. Harrison is survived by his widow, a daughter Kathleen, two sons, Frank and Harry, a sister Mrs. Burkholder of Wetaskiwin, and a brother in eastern Canada. The funeral service was conducted Monday afternoon at 2 o'clock in St. Andrew's Church with Rev. J. R. Davies of Ogden, officiating. Interment being made in the Gleichen cemetery. The following were pallbearers: Messrs. F. Daw, J. C. Buckley, Mr. Carrick, S. Duncan, J. A. Ostrander and David McBean.

Among the floral offerings the following were noted: The family; High School staff and pupils; Mrs. J. Wilson and family; Gleichen Old Timers Association; Mr. and Mrs. Boyd; Mr. and Mrs. Gorrill; St. Andrew's Sunday School; Mr. and Mrs. Foster; Mr. and Mrs. Swenter; Mr. and Mrs. Monte; Mr. and Mrs. Black and family; Mr. and Mrs. T. Bates; Mr. and Mrs. Yates; Mr. and Mrs. Foster and Sonny; St. Andrew's W. A.; Gleichen School Board.

## ELECT OFFICERS FOR MEADOWBROOK COMMUNITY HALL

The annual meeting of the Meadowbrook Hall and dance was recently held and was enjoyed by all who attended. Mr. Art Bremner and part of his band supplied most excellent music for the occasion. The officers for the ensuing year are as follows: President, George Bell; Vice-President, Claude Rouche; Secretary, E. B. Hayes; Directors: Mrs. A. McLeay, Mrs. G. Rousch, Tom Burns, Vorne Green, Floyd Sammons and Willie Burns.

Mr. and Mrs. Leroy Koeford entertained a number of their friends at a card party. The first prize was won by Mrs. A. McLeay and Mr. John Koeford. The Consolation went to Arthur Prowse and Mrs. McLeay. After a most delightful evening and lunch all went home wishing Mr. and Mrs. Koeford would entertain every Saturday evening.

Mr. R. A. McArthur of Capertown, Calif., is at present visiting his brothers J. A. and Ralph. He states that Alberta is no place for a fat man to live as it takes too many clothes to keep one warm.

The many friends of Mrs. W. McKeever will be pleased to learn of her speedy recovery from her recent serious illness.

Mrs. Bert Day has taken her small daughter Jean, to Calgary for tenail and adenoid treatment.

## SIEMENS-HAMAR

A pretty wedding was solemnized at the home of Mr. and Mrs. A. G. J. Hamar, when their second daughter, Lucille Ann, became the bride of John Martin Siemens of Hapman, Sask. The bride was given in marriage by her father, becomingly attired in blue crepe with crystal trimmings, attended by her cousin Miss Hamar, attired in yellow affairs. The groom was attended by his brother Mr. Abe Siemens. The ceremony was performed before an altar of wedding bells and flowers. During the service Miss E. McMillan sang "The Voice that Echoed 'I've Eaten' and 'When There's Love at Home' accompanied by Miss Jean Farquhar on the piano. After the ceremony about 50 guests sat down to buffet supper followed by games and dancing for the evening.

## BEAUDIN-BOOS

A pretty wedding was solemnized at St. Victor's church, Gleichen, on November 19th, when Della Rose daughter of Mr. and Mrs. William Boos of Gleichen, became the bride of Mr. Charles Edward Beaudin of Cluny. The ceremony was performed by Rev. Fr. McCormick. The bride wore a gown of white satin and was held by a wreath of orange blossoms and she carried a bouquet of pink carnations and maiden hair ferns. The bridesmaid was Miss Odilia Beaudin, a sister of the groom, while Mr. Bert Boos attended the groom.

Following the ceremony the bridal party returned to the home of the bride's parents where a wedding dinner and reception was held during the afternoon and evening, with only the immediate relatives and friends being present. Later the happy couple left for a short trip, then returned to Cluny where they will reside.

Two showers were given the bride previous to her wedding. The first being convoked by Mrs. P. Downey, Mrs. G. T. Jones and Mrs. Rodnicki. The second by Miss Ivy Hunter at her home to all her former school mates and girl friends. Judging from the many beautiful and useful gifts received it shows the high esteem in which the bride was held.

To one engaged in business it is vital to know as much as possible of the disposition and ability of the customers to meet their obligations, since the percentage of loss in accounts must be reckoned at stock taking period at the end of the year if the proprietor would know his actual financial standing. There will always exist the need for this caution so long as human nature continues to be human nature.

## CURLING CLUB ELECT OFFICERS ANNUAL MEETING

A general meeting of the Gleichen Curling Club was held at the rink on Friday, November 22, with about 20 members present.

President T. H. Beach called the meeting to order and the election of officers for the ensuing year continued. T. H. Beach was re-elected president as was H. B. Myers secretary. G. B. Phillips was elected treasurer.

The financial report for the past year was read by W. J. McKay and it showed a favorable balance on hand in the bank.

From all indications a successful season of curling is anticipated.

## LADIES SOCIAL CREDIT GROUP HOLD SESSION

The Meadowbrook Social Credit Ladies Group met on Thursday, November 28th at the home of Mrs. Maude Gillespie, with a very good attendance in view of the many illnesses and recent inclement weather making the roads most impassable. After a discussion of the work and future activities of the Group, the news flashes were read and an interesting paper by Miss Ruth McMillan entitled, "How Social Credit will Affect the Young People." Peggy Arthur sang a song entitled, "The Stream Line Train" after which the hostess served a delicious luncheon.

The next meeting will be held at the home of Mrs. Thomas Wilson, on December 12, at 2 p.m. instead of 3 p.m. as formerly.

A motion was passed inviting the men to join with the ladies during the winter months.

At the election of officers for the next year will be held it is hoped that all members will be in attendance.

## MRS. E. K. PINDER PASSES AWAY

After a long illness Mrs. Elizabeth Kent Pinder passed away Thursday in a Calgary hospital at the age of 66 years. That evening the remains were brought to Gleichen and on Saturday afternoon the funeral service was held in St. Andrew's Church with Rev. J. W. House officiating.

Mrs. Pinder was born at Stratford, Ontario, and was married on September 28, 1888. Three children were born to this union all of whom have preceded her. In 1908 with her family she came to Gleichen and has resided here ever since. Her husband predeceased her in October 1929. Deceased took great interest in church work and even though she did not enjoy the best of health made every effort to attend meetings in connection with St. Andrew's Church. She reared her own monument where she lived in the hearts of all who loved her. Her life was a complete work all done and well done constitutes completion. Her Christian life was beautiful from its beginning to its close, and through all the vicissitudes and sorrows that she met in the way her faith never wavered.

The funeral was very largely attended. The pallbearers were: Messrs T. W. Bates, Jr., A. E. Jones, T. H. Beach, A. Wilson, H. A. Phillips and Dr. C. R. McIntyre.

Mrs. Pinder is survived by three sisters, Mrs. Ostrander, Mrs. McPhoe of Gleichen and Mrs. Koebel of Peace River, and one brother Mr. Brookbank of Restonville, Sask.

Among the many floral offerings the following were noted: Mr. and Mrs. Ostrander; Mr. and Mrs. Brookbank; Restonville, Sask.; Col. and Mrs. Lewis; Mr. and Mrs. Clifford; Mr. and Mrs. T. W. Bates, Jr.; Mr. and Mrs. Haskayne and family; Mr. and Mrs. Black and family; Mr. and Mrs. T. H. Beach; Mr. and Mrs. H. Phillips; Mr. and Mrs. Michael; Dr. and Mrs. McIntyre; Mr. and Mrs. Plante and family; Mr. and Mrs. McQueen; Mr. and Mrs. Stubbs and family; Mr. and Mrs. Brown and family; W. H. James and family; Mr. and Mrs. Gorrill; Mr. and Mrs. Yates; Mr. and Mrs. Hutchison; St. Andrew's W. A.; St. Andrew's Sunday School.

English scientists have developed a new secret alloy of great hardness, which no drill has been capable of piercing. The metal is stainless, not affected by water, and sea parasites will not stick to it.

## ROBERT BLACK WINS SILVER CUP

During the school year of 1924-35 Robert Black proved to be the most diligent student in Grade 8 of the Gleichen public school, because he had won the silver cup donated by J. M. Telford of Vancouver, B. C. The cup was put up as a prize for the pupil who had the highest average in that grade for one year. Robert is the son of Mr. and Mrs. Jas. Black. Mr. Telford in writing Robert has the following to say:

"I received your kind letter of Nov. 6, informing me of your winning the silver cup I donated to you ever won it. I must say that you are a clever young man and will no doubt have good reason to feel very proud of it throughout your life. Also your family must naturally feel very proud of you. The intrinsic value of the cup is not to be considered to the social and other values. Also I have only kind wishes for Gleichen and Cluny citizens."

## CARBON MONOXIDE DANGER IN COLD WEATHER

A careful check over of your car at this time of the year in preparing for winter driving is essential according to officials. Close examination now may eliminate mechanical difficulties or other troubles that might develop during cold weather. Brakes and lighting apparatus should be given a thorough inspection, just to make certain that they are functioning properly and will continue to do so under winter driving conditions. Motorists also are warned to be on their guard against the deadly carbon monoxide. There always is danger in running the car in a closed garage. The approach of cold weather always brings an increased toll of deaths from carbon monoxide. To combat this hazard, motorists are urged to make sure a window of their car is always open and to keep their motors in accurate adjustment so that a minimum of harmful gas will be generated. The heavy toll of road accidents also

## GLORIA STUART IS POWELL'S FIRST BLOND SWEETIE

For the first time in his screen life Dick Powell makes love to a blond. He likes it. The blond in question is Gloria Stuart, who plays the leading feminine role opposite Dick in the First National Production "Gold Diggers of 1935," which comes to the Gleichen Community Hall next Saturday. She shares several love scenes with him.

In previous pictures Dick's romantic team mates have been either red heads or brunettes. Ruby Keeler, toward whom most of the young actor's cinema love has been directed, is dark. She has made five pictures with Dick. The latest being "Flirtation Walk."

"Gold Diggers of 1935," is a gigantic musical spectacle with 500 beautiful girls in the numbers staged by Busby Berkeley.

There is an all star cast which includes besides Powell and Miss Stuart, Adolphe Menjou, Alice Brady, Gladys Farrell, Frank McHugh, Hugh Herbert and Joseph Cawthron.

The local paper should be found in every home. No children should grow up ignorant who can be taught to appreciate the home paper. It is said to be the stepping stone of intelligence in all those matters not to be found in books. Give your children a foreign paper which contains not a word about any person, place or thing, which they saw or perhaps ever heard of, and how could you expect them to be interested. But let them have the home paper and read of people whom they meet and of places of which they are familiar and soon an interest is awakened. Thus a habit of reading is formed and those children will read the paper all their lives and become intelligent men and women a credit to their ancestors, strong in knowledge of the world as it is today.

### Difficult Problems

The problems which it may be expected will be discussed at the pending conference between representatives of the Federal government and premiers of the Canadian provinces will furnish plenty of material for conversations and negotiations.

If only one half of the difficulties which the western provinces have recently experienced and still are experiencing in finding sufficient revenue to maintain their ordinary services, to say nothing of contributing substantially towards the cost of relief, can be removed a forward step will have been taken, and representatives of the provinces will leave Ottawa with something a little more tangible than hope for speedy recovery and for future progress.

One of the factors in the present situation that will have to be faced squarely is the fact that the cost of government is proving heavily on the taxpayers, that there is just too much money available for the upkeep of services and that a shifting of burdens from one unit to another is not the way out of the trouble, though it may be a temporary palliative.

If several buckets are dipping water out of a well which is not being replenished from natural sources it is only a question of time when the well will run dry, and in the long run it does not make very much difference which of the buckets took most of the water out of the well.

That is actually the position of the taxpayer in western Canada. There are three buckets drawing on his resources, the federal, the provincial and the municipal, the last-mentioned, of course, including the schools.

The permanent solution of the difficulty lies not so much in a decision as to who is to be allowed to draw the most, or the least, water from the well but how the well is to be replenished, and until this can be determined, those in authority will have to address themselves to the task of finding ways and means of conserving the presently available supply and making the utmost of it.

There are many ways in which a conservation policy might be put into effect and one of the most practicable would be to eliminate a good deal of duplication and overlapping of services which have grown up, apparently without any blame attachable to any one in particular for the situation.

There are, for example, services which are being provided by both federal and provincial governments resulting in duplication of effort and waste of money, in addition to a degree of confusion and ineffectiveness attendant upon two unrelated organizations trying to reach the same good by different roads.

In this category might be included debt adjustment machinery and to some extent agricultural services rendered by both federal and provincial administrations. These are only cited as illustrations of a number of fields of endeavor in which co-ordination of effort by a merger of duplicated services would not only bring about greater efficiency but would also save considerable expense to the taxpayers.

It is true that in connection with these and other activities in the same category objection might be raised that dual service are essential because of the limitations of legislative competence, but if that is the sole barrier in the way of economy, then necessary legislative authority to dissipate the difficulty should be sought and doubtless could be secured if a spirit of true co-operation on the part of all concerned is evidenced.

In the matter of sources of revenue also there is duplication which should be eliminated by a better defined allocation of spheres of taxation as between the several governing units. There should not, for instance, be two income taxes with two sets of costly machinery to gather the same type of tax from the same taxpayers, necessitating a double expenditure.

In pre-war and pre-depression years the fields of taxation were fairly well defined and understood and governments, in those days, confined their revenue collection efforts within well defined channels. First departures from recognized practice and prerogative came with the emergency demands of the war and subsequently, as financial and economic stringency became more severe, governments were loath to abandon what they had gained.

On the contrary, the practice of encroaching on one another's sources of income assumed serious proportions as the level of the water in the well declined and the demand for more and more water grew with greater intensity.

With this situation confronting them, the participants in the conference will face a difficult task. While, no doubt, many suggested methods for replenishing depleted income will be offered, first thought probably will be given to conservation of the existing resources, and one of the most practicable means of doing this will be to stretch the tax dollar by eliminating duplication. This can be done, not only without impairing the services involved but should result in improving them and at a lesser cost.

### Are You Run Down, Tired?

Mrs. Mabel Harby of 11 Westinghouse Ave., Apt. 4, Hamilton, Ont., said: "About five years ago I was terribly run down, had indigestion, and my weight fell off 20 lbs. Before I had finished the first bottle of Dr. Pierce's Favorite Prescription I felt better, had more strength and better digestion." Favorite, bottles 50 cents, 10 bottles \$5.00. Large size, bottles or liquid, 12.50.

Cannot Get Italian Marble  
League of Nations' sanctions against Italy have created an unusual situation in connection with the new League palace which was scheduled to be occupied in November. Most of the Rose marble used in construction of the palace comes from Italy, and much of it is still due to arrive. League sanctions prohibit the reception of goods under export, import contract, so the League must look for its marble elsewhere.

### Finds Blindness No Handicap

War Veteran Has Developed Memory To Remarkable Extent

Captain Gerald Lowry, a blinded veteran of the World War, recently was one of the champion pair at the British Bridge League Congress at Harrogate, England. His partner was a woman. Not only did they win but they were always the first pair to finish their hands.

Blindness has its compensations. Nature to some extent releases the balance by developing other faculties. Captain Lowry is a remarkable example of overcoming the handicap and lives a more active and normal life than most people. He has developed his memory to such an extent that when a friend whispers the designations of his cards to him he remembers them throughout the game and where he has arranged them. When he has to play dummy, the cards are named to him and he remembers them, too. The rest is easy. During the Harrogate tournament he played 32 calls and never forgot a card.

Captain Lowry before the war was an ardent golfer and amateur boxer. He still plays golf and boxes. He tees his own ball and drives by instinct. His caddy tells him where his ball lies and where he should hit to, and he never misses. He also learned estocast and has built up one of the most lucrative practices in London. — St. Thomas Times-Journal.

### Begin in Ice Age

Scientists Believe Recent 'Quake' Originated 25,000 Years Ago

Persons whose sleep was interrupted by the recent earthquake may blame it on the great Ice Age. It is at least 25,000 years since the Ice Age ended, scientists estimate, but it was these same scientists who fixed its guilt.

Dr. L. C. Conant, director of the Cornell University seismological station, explained the general theory of earthquakes in the northeast is the earth is gradually recovering from the burden of a sheet of ice one to two miles thick.

"The melting of this tremendous glacier," he said, "took a tremendous pressure off the earth's crust. Every once in a while the earth stretches back a bit, moving just a trifle upward and northward. As a matter of fact, our instruments indicated there was a slight tilt to the north."

### 1935 Tobacco Crop

Valued At \$8,000,000

Blue-Cured Tobacco Industry In Ontario Ran On Scientific Lines

It looks as if the \$8,000,000 valuation put upon the Ontario blue-cured tobacco crop by the experts will be exceeded by the value of the actual production, made by Canadian and British manufacturers within the past few days. Yet it is only a few years since tobacco-growing in Canada was practically limited to a few farmers raising it for personal use for a limited local market. Now approximately 30,000 acres of the best soil in Southern Ontario are almost exclusively devoted to the raising of tobacco leaf in a scientific way, this year's crop amounting to 25,000,000 pounds and having a selling-value \$2,600,000 in excess of the crop return of 1934. The finest cigarette and pipe tobacco produced in Canada incorporate Canadian tobacco in large and increasing quantities, where, hitherto, American and other tobaccos had been used, while the Canadian leaf also has an excellent market in Great Britain in competition with foreign leaf.

The Imperial Tobacco Company of Canada, Limited, which buys a great part of the Canadian crop, has had much to do with the great strides taken by the tobacco-growing districts because it has had a policy for years of trying to encourage domestic production. First, however, it was necessary to gradually learn what and how to grow in order to meet public tastes long accustomed to foreign leaf. The company, at its own expense, imported cultivation experts, brought in the necessary plants and experimental material, the best grades of tobacco, taught the grower on his own land by introducing experimental plots and in other ways interested him in improving and enlarging his crop for the uses of the domestic market. It also illustrated to him the precise processes by which the domestic market might be developed in a profitable way. This and the researches of government experts, combined largely to producing the present condition and the creation from a small and unmarketable crop, a large and marketable crop, valued at more than \$8,000,000 a year.

The official edict has gone forth that the new styles for the ultra fashionable gowns will not embrace any wasp waists. There will, though, be a sting in the process.

Charwoman (to neighbor with whom she is having a spat)—"What I say is, there is ladies air!—and I say you ain't neither." 2125

### Reform in Examinations

President Of University Of Alberta Would Make Entrance Less Rigid

Entrance examinations to the University of Alberta were in the process of being made less rigid and formal, Dr. R. E. Wallace, president of the university, told 200 southern Alberta high school teachers in an address. He called the final examinations "the bugbear of Alberta teachers."

Reform in examinations would be directed towards leaving the teachers free to express themselves individually and then giving some fundamental, broad test to students matriculating from high school to university, Dr. Wallace said.

"We are trying to achieve the aim at the university that every examination paper set shall have one or two questions which cannot possibly be answered by memorizing notes," he continued.

The university president read an example of the type of examination he was proposing a set of four examinations presented by Alberta University authorities to determine the scholarship winner last year. They included general examinations to test knowledge in the fields of English, history, science and mathematics, having none of the formal type of examination question.

Expression of the teachers' personality must be made easier, Dr. Wallace declared, and lessening of the strict examination rules would be the most effective method of accomplishing this end.

All types of political and social theories should be taught in school, Dr. Wallace asserted, but teachers should keep their own personal bias on such subjects in the background.

### Grows Rice For Export

Australia Has Developed New Industry In Ten Years

Australia, which ten years ago imported nearly all of the rice consumed throughout the Commonwealth, is now producing not only enough for home consumption, but there is a surplus for export. The 1934-35 rice crop of New South Wales yielded 35,000 tons of paddy rice, not including that retained for seed, according to the Agricultural Department of the Canadian National Railways.

Stone Mountain is a massive dome of muscovite granite in De Kalb county, Georgia, and is said to be the largest in the world.

### Cattle Exports To U.S.

117,000 Head Shipped From Canada For First Ten Months

Approximately 109,000 head of heavy cattle have been exported from Canada to United States in the first 10 months of this year. Figures for the end of October reveal 117,000 head have gone over and it is estimated that 17,000 were calves. U.S. tariff on live cattle is three cents a pound when the animal is over 700 pounds and 2½ cents when below that weight. So a 1,100-pound steer would net a customs duty of \$32.

The year has witnessed an entire reversal in the export trade in Canadian cattle. Last year nearly all Canadian cattle exports for the first 10 months went to the United Kingdom. The total shipments were 46,500. For the corresponding period this year they were 6,500 whereas the shipments to United States jumped from 4,700 cattle and calves last year to 117,000 this year.

The reason for the shift was the shortage of beef cattle in the United States and relatively lower prices in United Kingdom market.

### Would Conserve Game Birds

Visitor To Alberta Admires Hunting With Hawks

Alberta offers an ideal place for the ancient and honorable art of falconry—the hunting of game birds with hawks—according to Capt. Luff Meredith, of New York.

First man to fly falcons in Alberta, Capt. Meredith was in Calgary after a visit to the Roanoke district, where he flew five birds—one an Alberta goshawk. He did not hunt game birds with his hawks, but flew them loose after pigeons.

The falconer advocated his chosen sport as a means of conserving game birds, at the same time aiding in the extermination of birds of prey such as crows and magpies.

"I believe the sport would be a great conservator of game birds in the west," he declared. "Unlike shooting, an entire party can share in the thrills of hawking."

If hawks were used generally instead of guns, the death rate among game birds would be cut to about one-tenth, he said.

### Must Be The Climate

A report from Fort Erie, Ont., of a lemon nine inches in circumference growing on a plant in a home there is a "small potato story," Mrs. J. D. Gillock of Calgary, claims. She said she has a lemon tree that last year produced a lemon 17½ inches in circumference from which she made two pies and two glasses of lemonade. At present there is on the tree a green lemon, still growing, which measures 11½ inches in circumference.

A United States government scientist has advanced a theory that explosions in city sewers are caused, not by sewer gas, but by exhaust gas from automobiles, which is heavy and sinks into sewers.

John Timko of New Toronto went to work at a factory with a clear conscience recently—he paid back \$12.40 relief money he received in 1934 when he was sick and out of work. Relief officials said it was the first case of its kind in the history of the town.

### London's Debt To Thames

City Is In Real Sense Founded On Ships

Its growth into the largest city of the country and of the world is owed by London to many historical accidents and to one very important fact—its geographical position. The seat of government might have been elsewhere and London might have had to share its political ascendancy with Winchester or New York. But it was almost inevitable that a large trading community should be established around the lowest bridge on the Thames, which flows into the narrow seas heading to the Continent and to the world. The Thames is the root cause for London's existence, and the city is in a very real sense founded upon ships—P.L.A. Monthly.

### ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons—instead of their doctors—on remedies for their children.

If they knew what the scientists know, they would never take this chance.

### Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia—the safe remedy for your child."

Remember this—And Always Say "Phillips' When You Buy Your child deserves it; for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now available at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

## The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches, or the pains of rheumatism, neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach, or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember, this "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

**Demand and Get "ASPIRIN"**

Eliminates Static

Boon For Radio Fans Is Seen In New Demonstration

Radio reception free from static even during thunder storms so severe that sparks leap from the antenna wire is the offering of Major Edwin H. Armstrong, professor of electrical engineering at Columbia University. He demonstrated the new system before the Institute of Radio Engineers in New York. He described the effect as the "static-free" method, a stream of traffic—the static—through an underpass while the desired signals went across the bridge. He said the secret lay in frequency modulation instead of amplification modulation, the prevailing system.

About 20 per cent. of the students preparing for the medical and dental professions in Germany are now women.

## Mothers Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer and Shorter Colds.

**SIMPLE AND EASY TO FOLLOW**

Already, thousands of Canadian mothers are benefiting by following Vicks Plan for Better Control of Colds—providing a simple plan that it is a practical home guide to fewer and shorter colds.

This commonsense, medically sound plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan for Better Control of Colds:

1. To Help Build Resistance to Colds. Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds. At the first warning nasal irritation, sniffle or sneeze, use Vicks Vapo-rub—just a few drops up each nostril. Vapo-rub is especially designed for the nose and upper throat—where most colds start. Used in time, Vapo-rub helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner. If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks Vapo-rub. Vapo-rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion. What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Vapo-rub and Vicks Vapo-lub.

## In Harmony With League

Course Taken By Canada At Geneva Is Satisfactory

The course taken by Canada at Geneva in regard to the Italo-Ethiopian dispute was correct and satisfactory and it was a matter for congratulation no empire bloc had been formed within the league under leadership of the British government, the Canadian Club of Montreal was told in an address by John W. Dafoe, editor-in-chief of the Winnipeg Free Press.

Most unfortunate misunderstandings would have resulted from such combination as an empire bloc, said Mr. Dafoe. The solidarity of the British nations was in common devotion to the league which they shared with other members.

"The course taken by Canada was correct and satisfactory though it could hardly be said its attitude was one of heroic leadership," said Mr. Dafoe in his address on "Canada's interest in the world crisis." "Canada has subscribed, though in guarded language, to the league theory of collective action; it has agreed to apply sanctions and it has made useful suggestions with respect to the application of sanctions. The Bestatt policy has been confirmed with added emphasis by the King government."

"The absence of any attempt in the recent elections to exploit this question for political purposes was very gratifying. Canada has rejected of watered-down interpretations of her obligations and is associating herself with the other British nations in support of the league. The Canadian reservations were not in disharmony with the provisions of the covenant."

## Canadian Maples in Paris

Number Of Trees Sent To France By Request

A number of Canadian maples, through the co-operative efforts of the Hon. Hector Laferte and President Conton, of the Paris municipal council, were recently sent to France, where they now stand at the foot of the Jacques Cartier monument on Canada Square, in Paris, and also on the grounds at Bagatelle, Bois de Boulogne and at Vincennes. Maple leaves have long been known throughout Canada for their exquisite beauty, particularly in the autumn, when countless citizens collect and prize them, and we consider that they are one of nature's most generous gifts to this country. The beauty and value of our maple leaf are publicly recognized as our two railroad companies, in co-operation with the Canadian Tourist Bureau, offer a series of monetary awards each year for the Canadian who submits the most beautiful, the most delicate, the largest and the best colored leaves. And, may we add, all this is but just tribute to a beautiful thing.—La Presse, Montreal.

## Most Northerly Farm

Planting Started On State Land In Soviet Arctic

That Igarka State Farm, the world's most northerly farm, has begun its 1935 sowing, was the word received by radiogram recently by the Russian administration of the Northern Sea Route. The farm is at 67 degrees north latitude. The proprietors expect to plant 135 acres to potatoes, cabbage, turnips and fodder crops. The plan also includes the planting of the Canadian crops. The remaining state farms in the Soviet Arctic have already planted an area of approximately 6,250 acres, according to Moscow reports. Stock breeding is being developed in Arctic territory, experiments proving that pigs and goats can be acclimatized to the rigors of polar weather. This year, a state farm is being established at 69 degrees north latitude, between the Yenisei and Pysalan rivers.

## Running Short On Food

A birthday party has been given in the Melbourne Zoo for a little platypus—an Australian duck-mole. He has set up a record by living a year in captivity. The platypus, which eats some 800 worms a day, is giving the zoo authorities a problem. The supply of worms is running out, so the curator is offering to buy worms at the rate of \$3 a pound.

A separate compartment has been invented to be placed on top of a crowded refrigerator, its contents being cooled with ice cubes made in the refrigerator itself.

The X-ray now can be used to determine accurately the size and weight of the heart.

Bees recently extinguished the lantern on a buoy off Scotland.

## Poultry Farm On Skyscraper

Secret Well Guarded By Modern Hotel In Brooklyn

That little spot in the country is no longer the prime necessity of the man or woman who would keep a few, or many, chickens. The day dawned when the great metropolitan hotels may control their own egg and broiler supply on the premises, and a Park avenue skyscraper palace may house a thousand millionaires and a hundred thousand fowls and baby chicks, writes J. J. Lawrence in the Sun.

By the same token, the bachelor's penthouse terrace may have its nook for farming—and the whole fascinating business may be a great secret, unguessed at, and not to be told.

There's a mystery in Brooklyn; an appetizing, juicy mystery! The guests in one of the modern hotels on Brooklyn Heights have been all a-twitter about the surpassing sweet and succulent broilers in the grill room and the breakfast eggs that are just the quintessence of all hen fruit within the memory of the oldest inhabitant.

They have begged for some of those eggs and broilers to send to the home folks, in place of orchids or bonbons, and talked about them in lobby and lounge; but they don't know yet—and not even the chef or the maitre d'hotel knows yet—that they come from above, like manna from the skies—yes, even from the topmost terrace of that same hotel, though never a cockle, crow or peep has been heard in the spacious roof garden or on its terraces.

The writer was the fifth person to be let into the well-guarded secret. He was conducted to a narrow terrace, far above the earth and New York harbor, an appreciable fraction of the distance to the stratosphere; and then the mysterious guide mysteriously pointed out a narrow iron ladder, and your correspondent swarmed up, like a fireman. The owner asserts emphatically that no guests of the hotel have ever suspected the presence of a single chicken on the premises, though the plant has been in operation six months.

## Diamond Is Indispensable

Mainly Responsible For High State Of Scientific Perfection

It is safe to say the civilization today could not have reached its high state of scientific perfection but for the diamond. Everything nowadays has to be made with an infinitesimal margin of error, and the diamond being the hardest thing in the world, its consequent capacity to resist abrasion makes it of inestimable value in industry. To give you an idea how hard the diamond is, Sir William Crookes once prescribed the following experiment: "On a flattened apex of a conical block of steel place a diamond, then upon it bring down a second cone of steel. On forcing together the two steel cones by hydraulic pressure, the diamond is squeezed into the steel blocks without injuring it in the slightest degree."

The diamond drill is an indispensable tool for mining engineers, for there is no rock or strata which the diamond cannot cut through, and the hardness of the bit makes a clean sequence of the rocks passed available for inspection. The crown of gems for cutting the two-inch hole costs about \$5,000. In other industries the diamond is equally important, as in the manufacture of electrical equipment. Diamond draw plates, used in drawing wire, are used in processes where an accuracy of .005 millimetres is sometimes necessary. — From the Sphere, London.

## The Body-Building Qualities of COD LIVER OIL PLUS

Additional Bone-Building Minerals

Strong bodies, straight bones and sound teeth are built from the mineral salts and vitamins in Scott's Emulsion.

Scott's Emulsion is vitamin rich Cod Liver Oil emulsified for quick easy digestion and combined with the bone and body building minerals, the Hydrophosphates of Lime and Soda.

PLUS VALUES you get ONLY in SCOTT'S EMULSION.

## Save "LEFT-OVERS" with Appleford's Presto Pack WAXED TISSUE

**MORE CONVENIENT TO USE....**  
Just hang a package in your kitchen. You'll be delighted with its convenience... for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

## Low And High Tides Cannot Be Answered

**Bore In Bay Of Fundy Is Highest In World**  
The lowest tide in half a century was witnessed on October 12 by the people of Lubec, Maine. Men in their boats were able to wade across the bay to Campobello Island, New Brunswick. The following day the waters of the Bay of Fundy rose to an unprecedented height. Boats tied up at wharves were lifted so high that their painters had to be cast off. Debris was washed into smokehouses, and an army of rats were driven from their holes on the waterfront. Extreme low and high tides were also reported from other points along the Maine coast.

The Bay of Fundy has the world's highest and most rapid "bore," the term used for a tidal wave which advances rapidly as a sort of wall into funnel-shaped bays and estuaries. At Chignecto it rises to over 50 feet, with a crest of three to six feet. The bore in the Amazon does not exceed 16 feet, and in the Severn, Trent and Solway Firth it attains a height of only two to three feet.—New York Sun.

Many of the farmers of Eastern Canada who fed Western lambs during the 1934-35 winter under the Dominion Lamb Feeding Project are placing increased repeat orders, in many cases asking for double the number of lambs they fed a year ago. The applications, particularly from Quebec and Ontario, reflect the abundant supplies of hay, grain, silage, and other crops in Eastern Canada.

Turtles eat a varied diet, from mushrooms to fish. 2125

The 22nd Battery are holding a turkey shoot in the Armories on Wednesday, December 4th at 2 p.m. This is the first public turkey shoot they have had since the new miniature range has been installed and it has already created considerable interest amongst local sportsmen. There will be 25 turkeys to compete for. Rifles will be provided or competitors may bring their own.

Bankers are not vocal creatures, says the general inspector of a Canadian bank. Still they have a capital way of attracting interest.

## Town & District

Mr. Black was in Bassano last week and took the opportunity to boost the Old Timers' dance amongst the Bassano old timers and stated that Billy Playfair and Chas. McKinnon hope to be present. Friends of Mr. Playfair will be pleased to hear of the new honors awarded him by the Bassano citizens. He is now mayor of that town.

Miss Marjorie McIntyre, R.N., has been relieving at the Blackfoot hospital for the past few days.

Born, Nov. 27, to Mr. and Mrs. A. Sauve, a son, Harry Gordon.

Miss Leonard, experienced in all lines of Beauty Work, will be at Mrs. P. Downey's home on Thursday and Friday, Dec. 5 and 6, to do Manicure, Fingerwaves, Facials and Manicures. Please make appointments with Mrs. Downey.

W. A. Stacy is now working as night operator at the C.P.R. station. He holds this position permanently as there has been an addition to the staff in the past few months.

Lance Sergts. W. H. Hamar and C. O. Phillips have been promoted to rank of sergeant, according to orders issued by Major E. Dugan, officer commanding 22nd Field Battery, R.C.A.

Right now the mail order houses are active in flooding the country with catalogues and advertising material, quoting attractive prices on articles and making all kinds of big sounding claims for one's money. A lot of money will answer these appeals. This makes one wonder if a little judicious advertising on the part of the local concerns, would not keep a lot of this money right here.

Good roads lead to the general improvement of the countryside. The individual who motors to and from town over a smooth well-cared for road will unconsciously come to affect corresponding improvements in the management and operation of his property.

## GLEICHEN UNITED CHURCH

Sunday, Dec. 8th, 1935.  
11 a.m. Church School.  
7.30 p.m. public worship. Subject: "What an old Bachelor has to say about Running a House." Some questions suggested by this topic: Relation of parents to children and of children to parents. Which has the greater responsibility for the character of young people—the home or the Church? There are forces at work in some of the movements of to-day to destroy both home and church. What is the prospect if these movements succeed? There will be much in this service of interest to young and old, and parents, teachers and young people should not miss it. It doesn't matter what church you belong to or whether you belong to any, you are welcome.  
Music, Anthem: "Stand up, Stand up for Jesus"

### GOON BEN BON

Goon Ben Ben, better known as Jun Kee, died here last week after an illness of about six months. The funeral taking place in Calgary Saturday. He is survived by one son in Gleichen and a daughter in the State of Washington. Jun in partnership with another of his countrymen built the restaurant he operated, about the year 1908. Some years later his partner died then Jun Kee took over the restaurant and operated it until his death. Jun was well liked by the white people of the town and when the occasion arose he did not hesitate to help them out. Long before the depression was ever heard of he was known to feed local townsmen all winter when they were down and out and in many cases was never paid.

A modern Gleichen dade sporting some extraordinary clothing, hair styled over his nose and a match in his mouth, addressed one of the town girls this: "If you was me and I was you, what would you do?" She hesitatingly said with a smile: "I would take off that hideous smile, put that match in the stove, part my hair on one side, then pray to God for brains."
